

R E M A R K S

Reconsideration of this application, as amended, is respectfully requested.

ALLOWABLE SUBJECT MATTER

The Examiner's allowance of claims 29-38 is respectfully acknowledged. Claims 29-38 have been amended only to make some minor grammatical improvements and to correct some additional antecedent basis problems so as to place them in better form for issuance in a U.S. patent. In addition, withdrawn claims 1-28 and 39-43 have been canceled, without prejudice.

No new matter has been added, and no new issues with respect to patentability have been raised.

Accordingly, it is respectfully requested that the amendments to the claims be approved and entered, and it is respectfully submitted that the amended claims 29-38 remain in condition for immediate allowance.

THE DRAWINGS

____The Examiner has objected to the drawings as not showing the features of the "light diffusing bodies" (claims 29-30) and the "two-dimensionally light-emitting type photoelectric devices" (claims 29-30, 33-34 and 37-38). In reply, the specification has been amended at page 73, lines 14 and 16 to clarify that the

screen 417 in Figs. 21 and 22 corresponds to the claimed "light diffusing body." In this connection, see also the disclosure in the specification at page 41, line 4 to page 42, line 22, which describes that a diffusing glass is used for the screen 417.

With respect to the claimed "two-dimensionally light-emitting type photoelectric devices," see the disclosure in the specification at, for example, page 69, lines 23-29, page 70, lines 15-20, page 72, lines 24-26, page 73, lines 3-6, and page 74, lines 3-5. That is, as disclosed in the specification, the image forming portions 411 in Figs. 21 and 22 are the two-dimensionally light-emitting type photoelectric devices of the claimed present invention. And as disclosed in the specification, the image forming portion 411 comprises one or more of the panels 310 (Fig. 18) of the reflection type liquid crystal devices.

In view of the foregoing, it is respectfully submitted that no amendments to the drawings are necessary, and it is respectfully requested that the objection to the drawings be withdrawn.

THE TITLE

The title has been amended to more clearly indicate the nature of the invention to which the claims are directed, as required by the Examiner.

THE SPECIFICATION

As pointed out hereinabove, the specification has been amended to clarify that the screen 417 corresponds to the claimed "light diffusing body." In addition, the specification has been amended to correct some minor informalities of which the undersigned has become aware, and the abstract has been amended to better accord with the requirements of MPEP 608.01(b) as required by the Examiner. No new matter has been added, and it is respectfully requested that the amendments to the specification be approved and entered, and that the objection thereto be withdrawn.

* * * * *

In view of the foregoing, entry of this Amendment and the passing of this application to issue are respectfully solicited.

If the Examiner has any comments, questions, objections or recommendations, the Examiner is invited to telephone the undersigned for prompt action.

Respectfully submitted,

/Douglas Holtz/
